

What does the BRWP do throughout the year?

The annual work plan is based on the “BRWP Strategic Plan” reviewed and updated by the Board and Steering Committee at an annual planning work session. You can view the current strategic plan in the ORGANIZATION section, Governing Documents. The watershed coordinator also has annual GOALS set with the Board (listed on website).

Activities include public informational forums, educational workshops, training opportunities and monthly Board business meetings coordinating the various active committees. Some BRWP activities done each year include river clean-ups, exhibits at county fairs and support to other community groups assisting the watershed like regional planning, parks, boards of health, soil & water conservation districts.
