

COVER CROP EQUIPMENT MODIFICATION

Sediment & Phosphorus Reduction in the Cranberry Creek & Bear Creek Watersheds.

- Farmer's goal is to plant cover crops in the Blanchard River Watershed (Focus in Cranberry Creek & Bear Creek) using their "Equipment Retrofit".
- Priority will be given to specified watershed. All Putnam County farmers are able to participate.
- Payment will be \$25/ac for every acre planted up to total cost of equipment purchased. (Maximum \$20,000)
- Soil Testing & Nutrient Management Plans will be done on all cover crop acres. Cost-share available for soil testing.
- Grant program will be 3 years.

Contact the SWCD office for more details
and any questions, 419-523-5159.
